CLOSE FINISH TO MATCH RACE

GUST LAWSON BEATS VAUGHN BY THREE INCHES.

Almost a Dead-heat—Motorcycle Balked and Tandem Pace Was Substituted.

Gust Lawson last evening beat Billy Vaughn out of the five mile match race by not more than three inches, the finish being about the closest thing to a dead heat that ever happened. For two laps the pair fought side by side, Gust on the pole and Vaughn riding as if for his life to pass him. As the crowd of the race had begun to subside, the machine had attained any speed. Without waiting for anything, Chapman and Iver, the riders of the hilly "red devil" jumped a tandem and set the best kind of pace throughout the race.

As in the match race between John Chapman and Oscar Julius a week or two ago, the motorcycle refused to act in a proper manner, a chain slipping connections. Luckily the accident happened before the machine had attained any speed. Without waiting for anything, Chapman and Iver, the riders of the hilly "red devil" jumped a tandem and set the best kind of pace throughout the race.

Fred Meakin came to the fore again as the strongest amateur on the track. He made a long sprint of a quarter of a mile, holding it nicely and finishing four or five lengths ahead of the other riders. The summaries:

Two mile open professional—Iver Lawson first, Clem Turville second, John Chapman third, Gust Lawson fourth. Time—4:05.

Five mile open amateur—Fred W. Meakin first, Jack Burris second, A. W. Smith third, Eddie Smith fourth. Time—11:11.

Five mile match race, professional, between Gust Lawson and William Vaughan—Lawson won. Time—10:42.

Papworth Won Time Prize.

The main sporting feature of the Nineteenth ward excursion to the Laguna yesterday was the bicycle road race over the eight mile course from Farnham to Farmington. The course was a very bad condition, the dust being several inches thick in places. The contest was an interesting one, however, to the many who witnessed it from the observation train. Parley Papworth, starting from scratch, and riding against three to five minutes handicap, finished third, capturing the time prize in 44. Thomas Jackson won three minutes handicap won first place.

BATTERYMEN—RED STOCKINGS.

Great Game of Ball Arranged For July 30 in This City.

On Monday, July 30, the Utah Battery men and the veteran Red Stocking team will cross bats on the diamond in this city. The entire proceeds of the game will go to swell the nucleus of the fund for the erection of a monument to great memorial aid to commemorate the deeds of the Utah volunteers in the Philippines, and without doubt there will be a very large attendance to witness the efforts of the invincible nine of years ago to hold their own against the boys who were never beaten either in peace or war.

Committees have been appointed to promote the financial success of the game. The citizens' committee consists of Mayor Thompson, Council President Burke, Councilmen Fernstrom and Robinson, P. H. Lannan, John Q. Cannon, A. W. McCune and Alex. Tarbet. For the volunteers Major Grant, Captain Critchlow, Lieutenant Naylor and George Klenke will act, and for the Red Stockings L. P. McKinnis, D. C. Dunbar, Gilbert A. McLean and Joe Barlow will work up an interest in the great event. It is proposed to make the afternoon of the ball game day a gala one in the city.

Don't Miss It.

HILL'S WATER SCHEME

City Officials Not Much Alarmed Over the Project.

COURT ACTION LIKELY

CITY IS GETTING ALL THE AVAILABLE SUPPLY.

City officials took more than a slight interest yesterday in the plan, as published in The Herald, of John P. Hill and his unknown associates to develop a supply of water below the city's source in the mouth of Emigration canyon. Some of the councilmen even took upon the scheme as one to sell the city's water to the municipality, but they believe that before the syndicate has a chance to make a proposition to the municipal administration it will be necessary to have the court enjoin interference with the city's water supply.

The day that work was commenced on the water prospect shaft Mayor Thompson and Land and Water Commissioner Westfield were apprised by Engineer Kelsey of what was going on and the evident purpose of the scheme. Since then the daily flow of Emigration water into the pipe system has been kept of six years ago, when Captain William Young was city engineer, the mayor and members of the council entertain but little fear that the syndicate scheme will amount to anything serious as against the city's interests. Along in 1894 and 1895 the city spent a good deal of money to develop a larger flow of water at the mouth of the canyon. Shafts were sunk ninety feet to bedrock and considerable drifting was done, with the expert conclusion that more water given, and the city will increase the flow into the pipe system to the maximum; that is, to secure 50 per cent more water than was possible to get by the old method then in use.

The maximum flow from the pump was then about 1,000,000 gallons every twenty-four hours, but two summers ago the city had the pipe line extended through a deep trench to tap the bottom of the pump, thus saving the expense of pumping, and getting nearly all of the available flow.

Tapping Will be Prevented. It is an admitted fact that a considerable flow of water can be secured by sinking to bedrock in any of the canyons below the places where the city has its intakes, but those in a position to know say it is preposterous to think that the municipality would permit any one to tap the source of supply, for such would surely be the result if prospect shafts were allowed to be sunk where indications point to the existence of underground flows.

An examination of the county records yesterday showed that no location of a water prospect has been filed covering the tract where the Hill syndicate is endeavoring to develop a supply. Neither is there any record of a prospect shaft on the land of the Sells Lime & Cement company been filed for record. It is a matter of record, however, that T. K. Jones, local manager of the smelting trust, is the guiding spirit in the time and money expended on the project, and the shift is being sunk, but the absence of any toll-free record filing would not be a sure sign of the result if prospect shafts were otherwise with the water development scheme.

One of Mr. Hill's Failures.

Some time ago Mr. Hill launched a scheme to develop a large supply of water from an underground flow on the west slope of the Oquirrh range, sufficient, it was declared by him, to irrigate the whole of the arid Thole valley. Nothing came of the project and the commissioners of that county ordered that the shaft sunk in the highway be filled up, which was done.

Knowing all these facts, the city officials are not unduly alarmed over movements of Mr. Hill in Emigration canyon, but nevertheless the mayor and his associates will keep a sharp watch to see that none of the city's rights are infringed.

ARCHBISHOP RIORDAN GIVEN AN ELABORATE RECEPTION

The most elaborate and successful social function in the history of the Catholic church in Salt Lake was the public reception tendered to Archbishop Riordan at the residence of Bishop Scanlan on Brigham street last evening. The leading people of the city, irrespective of religious belief, took advantage of the general invitation of the bishop, and during the reception paid their respects to the eminent visiting divine. The rooms of the spacious home were crowded from first to last by a happy assemblage of ladies and gentlemen, and the scene was one of great beauty and animation.

The ladies of the church, under the

ARCHBISHOP RIORDAN.

direction of Mrs. O. J. Salisbury, had worked a complete transformation in Bishop Scanlan's home for this occasion. The bishop has not a reputation for high living and luxury. On the contrary, his home is very plain and free from ornamentation. But in the hands of the ladies all this was changed for the time being. Electric lights were put all over the house, handsome paintings and rich draperies were hung, and the whole house was handsomely decorated with flowers, plants, flags and the many little things that women alone know how to distribute artistically. The general effect was pleasing in the highest degree, and when lively music by an orchestra and many beautifully dressed ladies were added to the scene, nothing was lacking to make a perfect picture.

Archbishop Riordan received the people in the east front parlor, which was made especially attractive with its tapestry of silk flags and its wilderness

of palms and potted plants. Bishop Scanlan stood on the left of the archbishop with the Rev. Father Kelley on the right. Assisting in the reception and the introductions were W. P. O'Meara, Governor Heber M. Wells, Thomas Kearns, George J. Gibson, P. H. Lannan, Joseph Geoghegan, James Ivers, O. J. Salisbury, Frank McGuire, Bishop Riordan and Bishop Scanlan were attired in the purple robes of their offices, and thoroughly enjoyed meeting the people. The archbishop met many whom he had known in former years, and was most happy to renew the acquaintance. He chatted pleasantly with the people he met and made

With his jaw broken in two places and the left side of his face most painfully cut, Nelson A. Naylor, an employee of the Studebaker Bros. company, lies at the Holy Cross hospital, where he will have to remain for a considerable period before he recovers his former strength and vigor. The young man's injuries were received at about 5 o'clock yesterday morning, while assisting to unload a dray that was freighted with vehicles.

The draymen were tugging away at a crate wagon on top of the load, and in his zeal to release the crate, which had become stuck, young Naylor used a crowbar to dislodge it. Unexpectedly the crate rolled off the dray with lightning-like velocity, and in its descent one of the hubs struck Naylor on the left cheek bones, mashing them as if struck by a sledgehammer.

By almost superhuman effort Naylor pushed the load off and released himself from his perilous position. To the astonishment of the men around him and with the grit characteristic of the young man, he walked nearly twenty rods from the scene of the accident before sitting down to await the coming of the hospital ambulance and Dr. J. S. Richards.

Once again, while the doctor was dressing his wounds, Naylor demonstrated that he had plenty of physical courage. Without a whimper he underwent treatment at the hands of Dr. Richards, refusing to take any opiate to make him insensible to his terrible pain. Dr. Richards complimented the young man by telling him he had never before seen such a splendid display of nerve.

The opinion of Dr. Richards, Naylor had a very close call from fatal injuries. As it is, the young man will recover, but it will be a long time before he will be able to resume his duties.

IN TERRIBLE PAIN NAYLOR DISPLAYS GREAT ENDURANCE

correct vote was 22 for the bonds instead of 20. The total vote was as follows: Spotted, 6; for bonds, 1,307; against the bonds, 739. Grand total, 2,046.

WELL WATER IS PURE

Engineer Kelsey Reports on Liberty Park Supply.

CANNOT USE SPRINGS

WILL COST LARGE SUM TO PUT IN PUMPING PLANT.

City Engineer Kelsey handed in to the council last night an elaborate report of the cost of using the water of the springs and flowing wells in Liberty park. It was read and referred to the committee on waterworks for recommendation.

The report declares that there are in the wells at Liberty park 1,380,500 gallons of pure water, and in the springs, which is seepage water, and wells, together, 2,354,000 gallons. But the opinions of professors of the state university and chemists, who have made an examination of the water, is given, and they declare that the water of the springs is unfit for domestic use. Thus there are but 1,380,500 gallons per day available from the wells. Mr. Kelsey estimates that the cost of a plant which would bring in 2,000,000 gallons per day, and he considers that it is useless to put in a smaller plant, which would be from \$34,000 to \$40,000. The difference is the variation in the bids of the various firms which offered to do the work.

Flow From the Wells.

But, according to the report, the flow from these wells is not the same at all seasons nor in all years. On Aug. 10, 1890, the flow from twelve wells was 25,000 gallons. From wells and springs the flow on that date was 2,851,000 gallons. On July 2, 1890, the flow from sixteen wells was 1,321,500 gallons. From the wells and springs it was 2,688,000 gallons.

Professor Hadley of the state university, when given samples of water, one from the wells and one from the springs, declared that the water from the wells was good and that from the springs contained too much animal matter for domestic use.

Mr. Kelsey said in the report that a part of the system of pumps could be installed in two weeks, but that to complete the work would require from four to six weeks.

Councilmen Whittemore and Davis together introduced a resolution providing that the superintendent of waterworks be authorized to appoint one man in each of the five city precincts to watch the use of water during the summer, so that the law in regard to it would be obeyed and no water wasted. It was voted down.

Canvass the Returns.

The city council met last evening as a canvassing board to consider the returns of the late election on the question of issuing water bonds. The returns were found to be practically the same as those given in The Herald the day after the election. In the seventh district the vote for bonds had been given as 28 the council found that the correct figure was 29. In the vote against the bonds it was 29 instead of 27. There were six spoiled ballots. In the thirtieth district the

Three Drown in Surf.

Watsonville, Cal., July 20.—Three persons were drowned at Camp Goodall today. They were bathing in the surf and venturing out too far were caught by the undertow.

HALF THE HEIRS SIGN

Accept Proposition of Pleasant Valley Coal Company.

BELIEVE OFFER FAIR

SUPT. SHARP ARRIVED FROM SCOTFIELD LAST NIGHT.

Nearly half the heirs have signed the agreement to take \$50 from the Pleasant Valley Coal company for each life lost in the Scotfield horror, in lieu of all claims for damages. Superintendent W. G. Sharp so stated last night upon his return from Scotfield. As to the final outcome, he ventures that very few, if any, of the interested parties will refuse the proposition of the company if one at least hopes there will be no dissension and that the plan will carry.

"Of course, our offer is a matter the heirs want time to reflect over," said Mr. Sharp, "and we want them to have all the time they desire. For that reason the work is going on rather slowly, but we will have the matter cleared up as soon as possible."

We have one man out in the state visiting those of the heirs who have moved away from Scotfield since the explosion, and obtaining their signatures, while the men at the offices at Winter Quarters are also taking signatures. From what returns I now have at hand should say that nearly half the heirs have signed the agreement to date, and so far as I know, there are none who have declined, although many have taken time to consider. I am hopeful that all will accept the terms of settlement."

If Heirs Should Refuse.

When asked what effect it would have with the company if one or two of the heirs refused the proposition, Mr. Sharp said it would largely depend on the attitude of those holding out. The company would carefully consider a situation of that kind, their agreement being entered into on the basis of all sign, the company has the right to cancel its proposition, but Mr. Sharp said he would very much prefer to see the plan fall through on account of a few being dissatisfied with the offer of \$50.

Speaking generally of affairs at the camp, Superintendent Sharp said that 350 men are now at work in the two tunnels, being almost as many as were formerly employed, and the town in a business way is rapidly recovering the effects of the awful calamity.

"A great many of these men being new to the mine," said Mr. Sharp, "of course they are not getting out as much coal as usual, but there is a good demand for the yield. The mine is again in shape to order, but there are yet some repairs to be made."

Plans of the Widows.

"It is my impression," continued Mr. Sharp, in answer to a question, "that the widows have plans for the future which they cannot carry out just at present. When the last of the general fund is distributed and the company's offer has been accepted and paid, many will go to other places where they have friends. That is the best plan, too, it appears to me. Some of the Finlanders have relatives in other parts of the country among whom they could find homes until affairs settled themselves differently, at any rate, and for that matter some could go back to Finland on the money they get from the company. I believe many will do so."

TO HOLD PRIMARIES.

Republican Committee Selects Polling Places For Monday.

Chairman Moyer of the Republican judicial committee for the Third district has selected places in the five city precincts where primaries are to be held on Monday. The five places are: First precinct, Ninth ward meeting house annex; Second precinct, Sixth ward meeting house; Third precinct, Taggart's hall, 875 First street; Fifth precinct, Eleventh ward meeting house annex.

The primary polling places for the county districts can not be given. The precinct chairmen, alone, know them and they have made no report to the chairman of the district committee.
